Professional experiences

Capgemini

Service Desk Technician | October 2018 - April 2021

- I worked as a Service Desk Technician, responsible for identifying and addressing issues experienced by network users. I would resolve problems directly or create a ticket in ServiceNow to assign the case to the appropriate IT team.
- I used Active Directory to respond to access requests and manage application installations via Software Center, ensuring compliance with LGPD regulations.
- Additionally, I performed VPN configurations when users encountered access issues.

TCS - Tata Consultancy Services

IT Analyst Jr. | August 2021 - August 2022

- I used the ServiceNow platform to handle tickets assigned to my team on fixing issues in the GPV-F (railway), GPV-M (mining), and GPV-P (ports) applications.
- When necessary, I added XML code to the applications to correct automation processes within Control-M.
- In the railway operations group, I utilized the Control-M application, which alerted me to any errors in daily automation tasks

NTT DATA

PTN1 Support Analyst BPO Jr. | April 2023 - June 2024

- Tickets opened in Movidesk to provide customer support for errors, inquiries, or service requests.
- Through the ERP system, corrections are made to products, packaging, invoice issuance, and billing.
- In ServiceNow, we receive details about issues that need resolution or requests for access and/or password resets for applications such as WMS, Egates, Logan, and PPMS

Tech Mahindra

Attending analyst | August 2024 - February 2025

- Through the ERP system, corrections were made to products, packaging, invoice issuance, and billing.
- Analyses were performed using Swagger and Postman to retrieve necessary information from the API in HTTP, XML, and JSON formats

Positivo S+

Bilingual Support Analyst | April 2025 - July 2025

- We acted as a back-end support bridge for corporate banking clients, handling issues related to application access, account registrations, and conducting instructional meetings on topics requested by clients.
- Support interactions were managed through email threads and tracked using CRMs generated via Microsoft Dynamics.

Freelance Experiences

Mozilla Builder [Bug fixing in Mozilla applications]

GNU Developer [Development and support with open-source code]

- **Programming languages used -** | JavaScript | Rust | HTML | CSS | Git | Bash - Shell | C |
